Business Litigation and Transactions

We are experienced attorneys who handle business disputes at every phase of the conflict. In today's complex business environment, companies often face unexpected legal challenges to their business. With meticulous and detailed analysis together with well-devised plans and strategies, we aggressively and effectively protect our client's interest.

Our legal acumen also provides our client with unique approaches to business negotiations and transactions. We promote our client's interest by attempting to resolve potential issues in advance through appropriate strategic applications. Our cost-conscious strategies will enable our client to take a strong position in possible disputes with their business counterparts.

Complex Commercial Litigation

We handle complex commercial litigation matters where disputes arise in connection with our clients' business activities. We represent companies in various industries.

Business Negotiations and Transactions

We negotiate and draft various business agreements such as license agreements and strategic business agreements. We also advise companies in consummating their business transactions and assist companies to comply with government regulations and laws.

Purchase and Sale of Business

We provide legal advice with regard to clients' purchases or sales of business. We also identify potential legal challenges arising from such purchases or sales of business and advise clients concerning possible preventive measures.

Formation and Management of Business

We assist clients in forming and managing their business. We advise clients in various aspects of legal and business opportunities in connection with their formation of new business entities. We also advise clients in terms of their entities' compliance with applicable government regulations or laws.

Commercial Real Estate

We represent landlord or tenant in negotiations concerning commercial real estate contracts such as lease, sublease, or assignment agreement. We conduct extensive due diligence to protect our clients' interest and provide clients with advice regarding various compliance issues arising out of the usage of the subject real property.

International Business Litigation and Transactions

We represent foreign companies, specifically headquartered in East Asia, including Korea, Japan, and China, before state or federal courts in connection with foreign companies' business disputes with their U.S. counterparts. Our proven experience in international business litigation provides foreign companies with effective strategies for successful results. Further, our attorneys speak Korean, Japanese and Mandarin Chinese and have extensive experience in resolution of business disputes between the individuals and companies located in the U.S. and other foreign countries.

We also assist foreign companies with the sale and distribution of their products in the U.S., the protection and licensing of their intellectual property, the formation of a partnership or joint venture with U.S. companies, and the establishment of their U.S. subsidiaries or affiliates.

Appellate Law

We believe that the appeals process or appellate procedure is very different from other aspects of litigation. Appellate procedure often proceeds at a much faster pace than general litigation. Given the circumstances of the appellate process, we work with the client in developing and simplifying the most complex facts and circumstances to create compelling arguments before the appellate panel that maximizes the client's chances for success.

We work closely with clients to develop a focused strategy to resolve business disputes or to negotiate business agreements as expeditiously and economically as possible.
